## GLADS

### C. & G. MELK

7731 W. Appleton Ave.  
MILWAUKEE 16, WIS.

← PAUL BUNYAN

DEAR GLAD FRIEND:

We take pleasure in sending you our 1955 Catalog. Our sincere thanks go to our customers for the many fine orders received in past years. We have tried to fill all orders with clean, true to name stock and will continue to do so in the future. We harvested a much larger crop of young bulbs grown from bulblets the past year than we have grown in several years.

For 1955 we are introducing our seedling 47-11 now named Paul Bunyan, a huge salmon pink on which we have had fine reports from test gardens in various parts of the country. A promising new glad in the 540 class. See picture on front cover.

In List No. 1 we offer a selection of Recent Introductions at Prepaid prices.

List No. 2 consists of varieties introduced prior to 1952. These quotations are at Wholesale F. O. B. prices.

In our descriptions the number following the name of the variety is the N. A. G. C. class number. This is followed by the name of the Originator or Introducer and the year of introduction. The last number is the approximate number of days to bloom from large bulbs. Very early planting or smaller sizes of bulbs will require additional time.

### **BUSINESS TERMS**

Prices are for Cash with Order or 25% Deposit to hold an order, balance before shipment or C. O. D.

All quotations are subject to prior sale.

Orders are filled with clean healthy stock, true to name and up to size. However, if error should occur, we will endeavor to make satisfactory adjustment either by replacement of stock or refund of the purchase price.

Stock is state inspected in the field and in storage. Certificate No. 597.

Shipment can be made either by Parcel Post or Express. If your order consists of both prepaid and F. O. B. items we will ship the entire order Express Collect and add extra bulbs to offset the shipping charges on the prepaid items.

Substitution: We do not substitute variety without permission. If out of size ordered we will substitute with next size larger or smaller to the amount of money sent. If you do not want us to substitute size, please advise.

## Introducing:

### PAUL BUNYAN

(540) Seedling No. 47-11. (Seedling x Seedling)

THE LARGEST GLAD we have ever grown. A huge salmon pink with deep rose throat marking. The color is just a shade lighter than Spic and Span. The 5½" ruffled florets are of very heavy texture, with good placement and firm attachment. Opens 8 to 10 with most of the remaining buds in color and a total of 22 buds. Flowerhead 29", height 60". Blooms in 85 days. Propagation and germination are both good.

We believe Paul Bunyan will be a real contender in the giant class. Its size can be judged by the picture on the front cover, yet it is not coarse looking as the florets are nicely ruffled and fluted and it has a lot of class for so large a glad. We have had very good reports on the performance of Paul Bunyan in test gardens located in New Jersey, New York, Pennsylvania and Idaho.

Large each \$2.00, 10 for \$16.00  
Medium each \$1.50, 10 for \$12.00  
Bulblets 10 for \$3.00, 100 for \$24.00

NOTE: The picture on our front cover shows Kenneth, age 5, son of George Melk, almost hidden behind a huge spike of Paul Bunyan.

### FORTUNE (422)

1954 Introduction

BRIGHT clear golden orange without blotch or markings. Color about midway between Orange Gold and Patrol. The 4½" florets have slightly rolled back petals, giving it a needle point effect. Opens 6 to 7 with 6 additional buds in color on a well balanced spike of 19 buds. Attachment is good and florets and buds are nicely spaced on a stretchy flowerhead of 26". Field height 58".

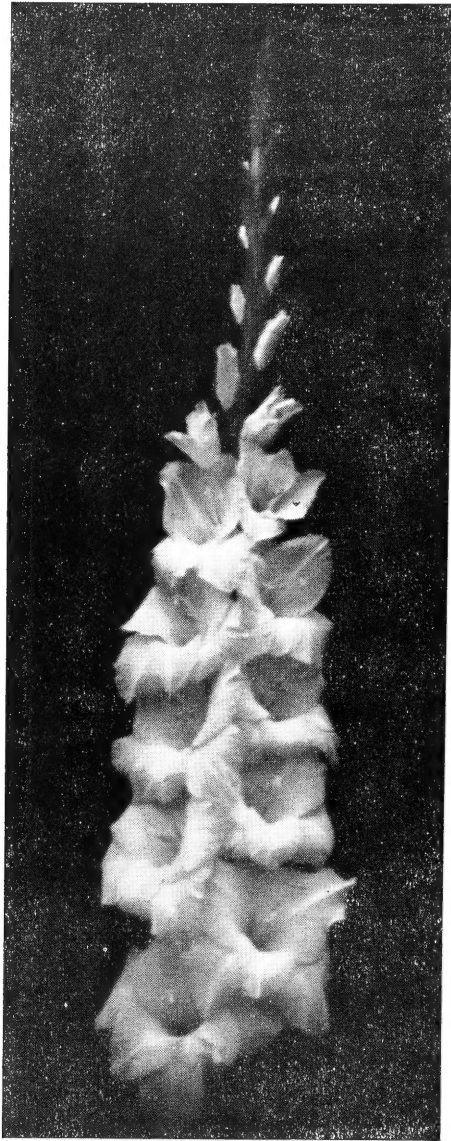

Blooms in approximately 80 days. Fortune should prove to be a valuable addition to the orange class because of its bright glowing color and dependable growing habits. Makes well proportioned spikes even from small bulbs.

Produces extra fine bulbs and is a good propagator and germinator.

## CELESTIAL ROSE (460)

1954 Introduction

GLISTENING clear light rose blending to a white throat. A very beautiful color. Opens 8 5" blooms with 6 buds in color on a 21 bud spike. Florets are beautifully formed and nicely ruffled. Attachment is good and the formal placement is near perfection. Flower-head 27", height 58", blooms in 85 days. Celestial Rose is an easy grower that consistently produces good spikes. Should be tops as a commercial and a fine show glad also.

This variety makes fine looking healthy bulbs and propagation and germination are both good.

Large, each \$1.50, 10 for \$12.00

Medium, each 1.00, 10 for 8.00

Small, each .60, 10 for 4.80

## MOTHER ANNE (466)

1954 Introduction

MEDIUM rose - lavender blending to a small cream throat. The  $4\frac{3}{4}$ " florets are rather deep and nicely ruffled. Informal placement. Opens 7 to 8 on a well balanced spike of 21 buds. Six additional buds in color. Flowerhead 28", height 56", blooms in about 75 days.

Mother Anne has a distinctive color that holds up well as florets open up the spike. Attachment, placement and spacing are all that could be desired. This should make a fine early cut flower.

An authority on glads says "one of the three new outstanding varieties in my garden."

Large, each . . . \$1.50, 10 for \$12.00

## MARGERY (462)

1953 Introduction

MARGERY—A very early large flowered variety (blooms in 70 days), is a brilliant cerise rose with a deeper rose throat. Many of our customers and visitors call it an American beauty rose.

Its color has a sparkle and luster that must be seen to be appreciated.

Margery easily opens 8 or more slightly ruffled 5" florets, with very good placement and firm attachment and most of the remaining buds showing color.

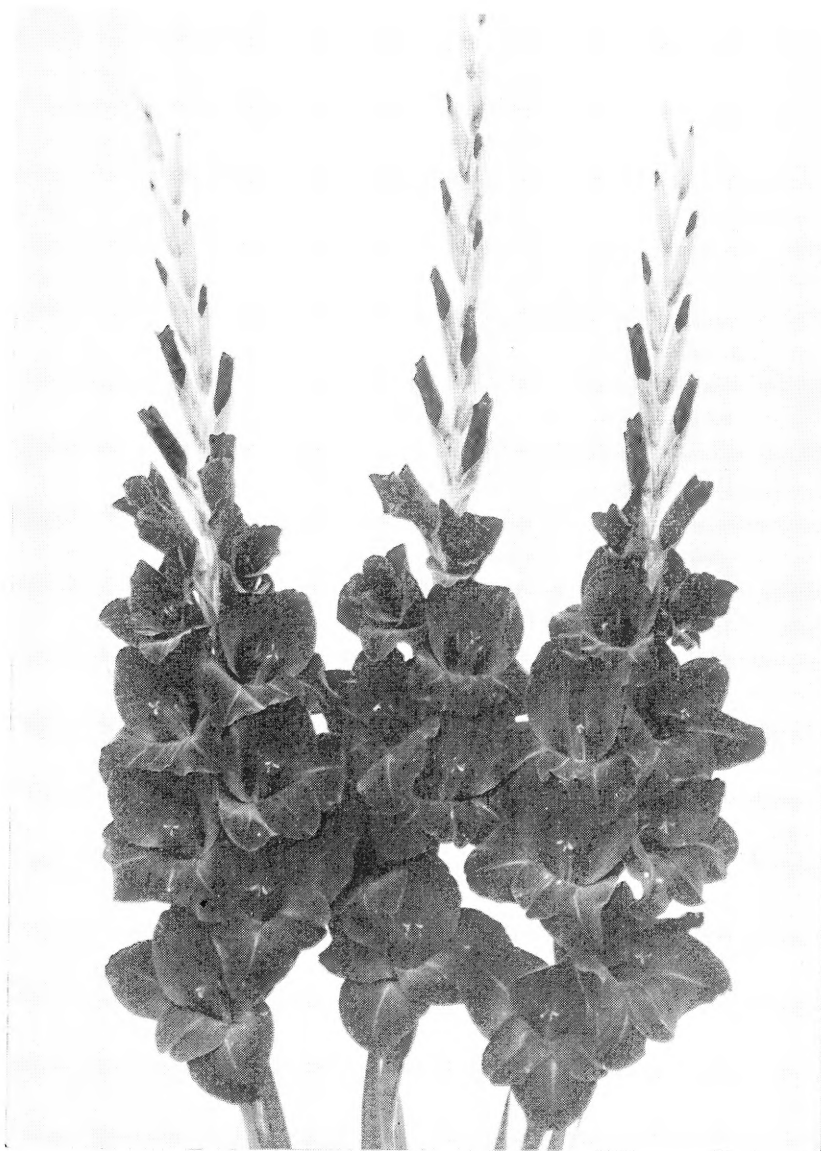

Under ordinary field culture the spikes will average 21 buds with a 26" flower-head and a field height of 58". Foliage is deep green and of medium height making the tall spikes easy to cut. Margery produces high crowned and healthy bulbs. Bulblets are of average size and germinate easily. Propagation is good.

This past season we planted some large bulbs of Margery in our first planting of all early varieties and it was the first large flowered variety to bloom and only a few days later than the extra early small flowered varieties. Because of its earliness, extra fine color and dependability Margery will be a profitable variety for the commercial grower.

**RED RADIANCE**

## RED RADIANCE (450)

1953 Introduction

RED RADIANCE is a very bright and clear light red without markings of any kind, a shade of red that the florist can use in quantity. Opens 8 to 10 5½" florets of heavy substance and perfect placement on tall sturdy spikes of 20 or more buds, 6 buds in color. Spacing and attachment are ideal and spikes are of good proportion.

We feel confident that Red Radiance is one of the finest commercial red glads available today. It makes fine bulbs and plenty of bulblets that germinate easily.

Red Radiance makes tall, straight spikes which consistently grow up to 5 feet. The plants are wide leaved and of medium height, making it possible to cut long stems and save most of the plant for bulb growth.

The plants of Red Radiance are very wide at the base and the spikes stand up well in rain and wind when many others go down, this being of great importance to commercial growers.

If you are a cut flower grower you cannot afford to be without Red Radiance.

Each	L \$ 1.00	M \$ .75	S \$ .50	Blbts. 10—\$ 1.00
